	Course Name	INTRODUCTION TO KOREAN ARCHITECTURE AND ITS URBAN FORMS IN SEOUL				
	Lecture Schedule	Mon-Fri / 09:00~12:00				
	Course Description	This course explores the evolution of Korean architecture and its urban form from ancient times to the contemporary era. Students will examine key architectural styles, influential historical events, and cultural factors that have shaped the built environment in Korea. Through a combination of lectures and field trips, participants will analyze the interplay between architecture and urban planning, highlighting significant structures and urban developments across different regions and periods.				
	Course Objective	- Analyze the historical development of Korean architecture and urban form. and the impact of social, political, and cultural changes on the built environment. - Develop critical thinking through discussions, case studies, and site visits. - Engage with current architectural and urban issues in Korean cities.				
	Prerequisite	- Due to scheduled trips, it is highly recommended that people who take this course do not have classes right after this course as trips can take up to three hours including travel time. - This course includes multiple field trips and site visits throughout Seoul. Students should expect additional transportation and admission expenses associated with these visits. - none, but some knowledge in architecture or design is recommended
